FEATURED PROGRAM

Mechatronics Technology – Industrial Maintenance Associate in Applied Science

The Mechatronics/Industrial Maintenance Technology Program prepares students as entry level technicians in diversified manufacturing industries. This exciting program is located on HGTC's Georgetown Campus, in close proximity to Boeing.

Students will gain knowledge and skills in:

- Reading industrial schematics and drawings
- Understanding direct current (DC) and alternating current (AC) circuits
- Analog and digital electronics
- Programmable logic controllers (PLCs)
- Motor controls and drives, robotics, and fluid power systems including mechanics, pneumatics, hydraulics.
- Instrumentation needed for computerized integrated manufacturing.
- Emphasis is placed on predictive maintenance, troubleshooting and quality assurance.

EMPLOYER SPOTLIGHT

Progress Carolina is an unlimited license general contractor and construction management firm. Our highly skilled, experienced team has collectively developed and built over 80 communities in the United States. Based in Conway and Myrtle Beach, South Carolina, our energetic team has completed a range of projects which include market rate multi-family, single family, affordable multi-family, and student housing communities. We are currently looking to fill positions in our construction operations and project management departments for both full-time positions and our internship program.
