

Web Pages

Summary

HTML and its related technologies offer the most flexibility in terms of support on different devices and platforms and support for people with disabilities.

Accessibility Problems

Web page accessibility does not happen by default. It must be a conscious decision to design pages with accessibility standards.

Accessibility Features

- numerous options and features to enhance accessibility.
- near total control over design.
- easy for faculty to create a new file in Desire2Learn, edit formatting, and then view HTML source editor for further changes.
